MEMORANDUM FOR: Director of Special Activities  
Director of Special Projects  
Director of ELINT  
Director of Scientific Intelligence  
Director of Foreign Missile and Space Analysis Center  
Director of Computer Services  
Director of Research and Development

SUBJECT: Report to the PFIAB for 1971

1. Based upon your contribution, the annual PFIAB Report has been written in draft form by O/PPB. The attached memorandum from O/PPB, subject: same as above is self explanatory. Pages of the draft applicable to your office are attached. Since your submission there may have been changes or developments worthy of note (e.g. [ ]). These should be incorporated into the draft.

25X1A

2. Changes, additions or deletions should be made in pencil on the xerox copy. Since we have a short due date to meet, we request you return the corrected pages not later than 19 August. Any questions should be directed to [ ] on extension [ ]

13 August 1971

MEMORANDUM FOR: Planning Officer, DD/S&T

SUBJECT: Report to the PFIAB for 1971

1. Attached are preliminary drafts of the sections of the PFIAB Annual Report to which you made contributions. I would like to have any revisions not later than c.o.b. Monday, 23 August.

2. In general every section of the report sounds a great deal like last year's effort. We realize that to a great extent this is unavoidable, but if you have more interesting examples of your activities to offer we will be pleased to use them. In particular, we ask that you give special attention to the RD&E section. We would also like a submission from OEL concerning signals processing, so that we may fill out our IP&E section.

3. Every contribution has been cut a good bit, and some have been reorganized. We will be sympathetic to changes you propose so long as they do not lengthen the report. By all means correct any of our misinterpretations of your facts, and please look carefully at any numbers which are included in the report.

4. You will note that all matters relating to CIA's SIGINT collection efforts have been included in a single part of the report. We hope that this reorganization will avoid an apparent repetition of themes. TSD has asked to review the RD&E section and we have sent a copy to them.

5. As you know, [ ] is drafting the PFIAB Report this year, and any questions which you have may be directed to him on [ ]. We should have a final draft for your consideration soon after we receive your comments.

The Aircraft Flight Maintenance Report (AFMR),  
put in use during the past year, is the prime method for reporting of  
all U-2 system malfunctions to Project Headquarters via a standard  
simplified message format. Thus, management and engineering have  
been able to anticipate potential problems and initiate corrective  
action prior to their becoming critical. The AFMR has improved  
schedule effectiveness by approximately 30%, resulting in a net  
increase of one operational aircraft for mission accomplishment.
